

## Industrial Revolution: Cause and Effect Flow Chart

*Directions: Look at the major events of the Industrial Revolution listed below. Place them in order by writing them on the flow chart at the bottom.*

Farmers were more efficient and could grow more crops

The available labor force grew because there were extra people no longer employed in farming

More people moved to the cities to find jobs which caused cities to become crowded and polluted

The increase in agricultural efficiency meant that the need for farmers decreased

More factories opened up in cities where a majority of the unemployed people lived

During the late 1700's and early 1800's, agricultural technology advances

Factory owners could hire cheap workers from the expanded labor force

More entrepreneurs were willing to open factories because they could easily find large numbers of unemployed people
